

IISA SMME Loss Adjuster Development Programme

Managing a small or medium loss adjuster firm is never easy. You're building credibility, chasing growth, and competing with bigger players every day.

The SMME Loss Adjuster Development Programme, created by the Insurance Institute of South Africa with the support of Sasria SOC Limited, is a 12-month journey designed to help black South African loss adjuster business owners strengthen their firms, gain exposure, and compete with confidence.

The programme will focus on ethics and compliance management, followed by business sustainability workshops, mentorship, and real claim exposure. Over the year, your company will be guided from early-stage growth to advanced practice, with quarterly feedback and a final evaluation that will demonstrate the progress and impact on your business.

At the end of the programme, your business will be more resilient, credible, and positioned for bigger opportunities in the insurance industry.

Who Should Apply

- Black South African business owners in loss adjusting.
- Owners of small and medium loss adjuster firms who have the ambition to grow and compete at a higher level.
